FLIGHT RESEARCH ASSOCIATES RETAINS INTERFLIGHT GLOBAL CORPORATION TO DEVELOP ITS BUSINESS IN THE SOUTHEAST US, LATIN AMERICA, AND THE CARIBBEAN

On March 7th, 2010, James Miller, President of Flight Research Associates (FRA), and Oscar S. Garcia, Chairman and CEO of InterFlight Global (IFG), signed a retainer agreement giving IFG the green light to represent, promote, and enhance FRA's specialized services in their core Americas continent business areas - namely, human resources placement, ATC research and development, Aviation English development, as well as NASA/FAA simulation projects. IFG will enhance FRA's Americas footprint, leveraging on FRA's already in progress expansion.

James Miller commented, "Having known Oscar Garcia for many years as a professional pilot and business executive, we are confident that our new relationship with IFG will provide significant growth for FRA. IFG has an intense aeronautical and aerospace know-how and focus on developing and promoting client businesses in the Southeast USA and Europe, as well as the Caribbean and Central and South America. In addition to expansion within the Americas, we have a vantage point of global connectivity extending to the Middle East-Gulf Region, India, and the Asian continent."

Garcia stated, "I have worked with James Miller for years and have been a client research pilot for him, experiencing firsthand the quality and professionalism of FRA's services. It is only logical that FRA has decided to venture into an international expansion plan coinciding with the robust position of the Latin American regions and the commencement of an 8-10 year macro-economic cycle."

About Flight Research Associates

FRA is a multi-faceted, aviation-oriented company that specializes in providing aviation professionals for research, training, consulting and project management to both government and private industry.

Since 2005, FRA has provided NASA and FAA researchers with highly experienced pilots, air traffic controllers, dispatchers and other subject matter experts as team members in aeronautical research. FRA is actively involved in the testing and training of pilots and controllers world-wide to meet International Civil Aviation Organization (ICAO) Aviation English testing and training requirements. FRA conducts professional pilot recruitment for airlines in Asia and the Middle East.

As aviation professionals with an averaging of more than 30 years of experience, our commitment is to exceed our customers' expectations for quality, responsiveness, and professional excellence.

About InterFlight Global

IFG is one of the world's leading Commercial Aviation and Aerospace advisory and consulting firms. Since 1992, IFG principals have been involved in most sectors of the aviation and aerospace industries as advisors and consultants to shareholders, senior executives, government institutions, civic foundations and investors, alike. IFG provides its clients with expertise tailored to their business needs from its downtown Miami headquarters and its affiliated regional offices worldwide. IFG provides solutions that combine a true global perspective with a detailed local outlook.

IFG's client book encompasses a wide array of businesses and sources of capital - including public transportation departments, airlines, and aircraft manufacturers.

IFG's vision is to effectively achieve all that is possible when aviation and aerospace enterprises are expertly advised and counselled.

IFG's mission is to provide its clients with superior value-adding business solutions involving all aspects of the commercial aviation and aerospace industries and their chains of commerce.
